

NEW PRODUCT RELEASE

9500 SERIES GAS SHOCKS

Correct Application Valving Technology is based on extensive shock dyno and ride control research offering the most application specific part numbers available for on and off-road light trucks and SUV's. This results in:

- Increased stability for improved handling
- Longer front end and tire life
- Less nose dive on severe braking
- Less squat on hard acceleration
- Smoother ride-control without harshness

NEW APPLICATION FOR 9500 SERIES GAS SHOCK
